
Alcor MP V16 - Flash Drive Recovery Tool

Apr 27, 2010 Alcor Micro Controller: AU6989 Flash Drive (5.3GB). Has anything changed in this format lately? I've been trying to keep my contact updated on this but the "Alcor" site seems to have almost no information on it (the Alcor page only mentions a "NSE 2.0 F/W 734A" and the "Alcor Au6989 Flash" page only mentions "2007/08/22,"...) Category:Flash buses

Tatra V 355 The Tatra V 355 was an early Polish people's car produced by Tatra Automobilová Spolovávni Jízdce (TASJ), a division of Tatra vehicles based in Pardubice, Czechoslovakia. The first model entered production in 1929. It was an all-steel, four-door, three-passenger people's car produced in right-hand drive configuration, though assembled in left-hand drive in Czechoslovakia by TASJ's Škoda factory in Plzeň. It was a twin to the Škoda, with which it shared much of the chassis, including the doors, front bumper, the front fenders and lower bumper. The only major differences were in the engine compartment, with a Škoda petrol engine instead of a TASJ water-cooled one. (The original Škoda engines were five-cylinder, but in 1932 they were changed to the four-cylinder due to supply problems.) TASJ were short of engines and had to use the Škoda engine, and thus designated them as the V 355. Models assembled by Škoda in Plzeň were given a Škoda nomenclature prefix. The V 355 thus appeared as the Škoda 355. The TASJ V 355 was not sold with an accessory drive but was equipped with a standard differential with two wheels on each side. The lower differential was lubricated through a single pump. The brakes, controlled by pedals in the center of the driver's compartment, were hydraulic brakes with wooden sliders controlled by cables that were strengthened with steel bands. The public price of the Škoda 355 (from 1930) was 36,000-38,000 Kčty. During the 1930s, it
