You can also get the Malwarebytes for Mac from the developers

Description Retro City Rampage is a game about destruction. You play as a post-apocalyptic hero who is on a quest to rescue his girlfriend from the clutches of Big Evil Corporation. Your first step is to create your own city out of the wasteland. In Retro City Rampage, there is no HUD, no mission progress bars, and no NPCs to kill. Instead, you travel between missions at your own pace. You explore, shoot, smash, jump, drive, or fly into objects to solve puzzles. Enemies are designed to be intimidating, but friendly towards you.
